

Greggs reduce energy consumption across their AC & Refrigeration estate by 43%

Coolnomix units were installed at Greggs stores in the North of England and in the South East attached to their air conditioning and refrigeration systems in an attempt to reduce kWh consumption to combat both rising energy prices and climate change.

One Coolnomix AC -01 unit is reducing Greggs air conditioning units kWh consumption by 11.3kWh per day and 1,175kg of CO₂ every year.

AVERAGE DAILY CONSUMPTION:

COOLNOMIX ON: 15.1 kWh

COOLNOMIX OFF: 26.4 kWh

savings: 11.3 kWh per day.

43% Energy Savings
